

Maxwell Technologies, Inc.
Conflict Minerals Report
For the Year Ended December 31, 2014

This Conflict Minerals Report (“Report”) for the year ended **December 31, 2014** has been prepared in accordance with Rule 13p-1 of the Securities Exchange Act of 1934 (“Rule 13p-1”). Certain terms in this Report are defined in Rule 13p-1, and the reader is referred to this Rule and to Release No. 34-67716 issued by the Securities and Exchange Commission on August 22, 2012 for these definitions.

Conflict Minerals, as defined under Rule 13p-1, include tin, tantalum, tungsten or gold, or their derivatives. Maxwell Technologies, Inc. (“Maxwell” or the “Company”) manufactures, or contracts to manufacture, the following *High Reliability* products containing Conflict Minerals necessary to the functionality or production of the products:

- *Ultracapacitors*, which are energy storage devices providing highly reliable energy storage and power delivery solutions for applications in multiple industries, including transportation, automotive, information technology, renewable energy and industrial electronics;
- *High-Voltage Capacitors*, including grading and coupling capacitors and capacitive voltage dividers that are used to ensure the safety and reliability of electric utility infrastructure and other applications involving transport, distribution and measurement of high-voltage electrical energy; and
- *Radiation-Hardened Microelectronic Products*, including single board computers and components incorporating Maxwell’s proprietary technology that enables them to perform reliably in space.

In accordance with Rule 13p-1, Maxwell undertook due diligence to determine the source and chain of custody of Conflict Minerals necessary to the production or functionality of its products. In conducting its due diligence, Maxwell applied the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (“OECD Due Diligence Guidance”), an internationally recognized due diligence framework. The objective of this due diligence is to determine whether Conflict Minerals originated in the Democratic Republic of the Congo or an Adjoining Country (collectively defined as the “Covered Countries”), and if so, whether sourcing practices directly or indirectly financed or benefited Armed Groups in the Covered Countries. Under Rule 13p-1, “DRC conflict free” refers to products for which sourcing practices did not directly or indirectly finance or benefit Armed Groups in the Covered Countries. In this Report, Maxwell uses the term “conflict-free” more broadly to refer to suppliers, smelters and refiners that source Conflict Minerals without funding conflict as described above.

Maxwell exercised reasonable due diligence to determine the source and chain of custody of its Conflict Minerals in accordance with the OECD Due Diligence Guidance. These procedures included the following:

- Formed a steering committee with executive leadership responsible for overseeing the Company’s compliance with Rule 13p-1, including the design and execution of a due diligence plan;
- Established a Conflict Mineral Policy and published the policy on its publically-available internet site;
- Determined in-scope suppliers of materials and components that contain or may contain Conflict Minerals and conducted supply chain surveys to assess the usage of Conflict Minerals and to identify the smelter and refiners of Conflict Minerals in the Company’s supply chain;
- Implemented a third party software program to assist with the execution of the Company’s 2014 conflict minerals due diligence program;
- Implemented a standard purchasing agreement template containing provisions requiring key suppliers to meet the standards in our Conflict Minerals Policy;
- Reviewed and evaluated responses received from in-scope suppliers for completeness and reasonableness and conducted several rounds of follow up on incomplete responses;
- Evaluated smelting and refining facilities identified in the Company’s supply chains for Conflict Minerals against the list of smelters and refiners that have been designated as “conflict-free” under the Conflict-Free Smelter

Program sponsored by the Electronics Industry Citizen Coalition and the Global e-Sustainability Initiative ("EICC-GeSI"); and,

- Assigned a risk score to each of its suppliers of Conflict Minerals based on mineral sourcing practices in order to determine corrective actions and further due diligence measures to be performed.

For the supply chain surveys described above, Maxwell conducted these surveys utilizing the Conflict Mineral Reporting Template developed by EICC-GeSI. All responses received from suppliers were reviewed and evaluated for reasonableness and completeness and all identified smelters and refiners were checked against the EICC-GeSI list of certified "conflict-free" smelters and refiners to determine whether the facility has been independently certified as "conflict-free". To date, not all suppliers have responded to Maxwell's survey, and for those suppliers which did respond, many responses were incomplete in that not all of the indirect suppliers underlying Maxwell's direct suppliers have provided complete location of origin information for Conflict Minerals. Therefore, the source and chain of custody information for Conflict Minerals included in Maxwell's products is currently incomplete. Further, to date, very few smelters and refiners have been designated as "conflict-free" under the EICC-GeSI Conflict Free Smelter Program.

Below is a summary of the number of suppliers surveyed for each product line and the responses received to date:

- For *Ultracapacitor* products, 59 suppliers were surveyed and approximately 96% of suppliers have provided a survey response.
- For *High-Voltage Capacitor* products, 6 suppliers were surveyed and 100% of suppliers have provided a survey response.
- For *Radiation-Hardened Microelectronic* products, 50 suppliers were surveyed and approximately 97% of suppliers have provided a survey response.

Identified smelters and refiners and countries of origin for Conflict Minerals included in the Company's products, to the extent known, are listed in attachment A to this Report.

For the 2015 compliance period, Maxwell plans to continue to execute due diligence measures to determine the source and chain of custody of its Conflict Minerals and to further mitigate the risk that its necessary Conflict Minerals fund conflict in the DRC. Specifically, Maxwell intends to focus on the following procedures:

- Design additional risk mitigation measures for high risk suppliers and implement corrective action plans for these suppliers;
- Develop a plan to roll out new standard purchasing agreements, containing provisions requiring compliance with Maxwell's Conflict Minerals Policy, to our current key suppliers;
- Conduct supply chain surveys on the source and chain of custody of Conflict Minerals for the 2015 compliance period with the objective of obtaining current sourcing information for 2015 and improving the completeness of source and chain of custody information for Conflict Minerals in the Company's products.
- Engage an independent auditor to perform an audit of the Company's due diligence program for the 2015 compliance period.
